An underlayment with a built in adhesive

The patented silentPREMIUM acoustic underlayment allows Purline 1200 flooring to be installed without messy flooring adhesives.

SilentPREMIUM has a built in adhesive top coating to allow clean and simple installation of Purline flooring without the need for additional adhesives.

“silentPREMIUM” consists of up to 90% naturally occurring raw materials, produced without the use of plasticizers, formaldehyde, halogens and heavy metals.

Read the Purline 1200 installation manual for detailed installation requirements.
